

Pranjal Pokharel - Resume

pranjalpokharel007@gmail.com | Lalitpur, Nepal | <https://github.com/pranjalpokharel7>

Education

Undergraduate: Bachelor in Computer Engineering (BCT), Pulchowk Campus, IOE, Tribhuvan University [2018-2023].
Aggregate Percentage: 75.5% (out of 100%).

Relevant Skills

- **Programming Languages:** Rust, Python, JavaScript/Typescript, C, C++, and Go.
- **Backend Development:** Proficient in **Django**, **FastAPI**.
- **Frontend Development:** Experience developing apps in **React/Next.js**.
- **Databases:** Strong expertise in **PostgreSQL**; basic experience with MongoDB, Redis, BadgerDB.
- **Cloud & DevOps:** Experienced with **AWS** (EC2, ECS, Lambda, S3, RDS, DynamoDB, Cognito, Amplify).
- **Linux:** 4+ years of using Linux for professional development.

Professional Experience

- **Software Engineering Intern** (April 2025 - Jun 2025) at **Alpen Labs**.
 - Primarily worked on the checkpoint (L1) sync for the **Alpen client** (L2 rollup to bitcoin), functional tests, and bugs related to cli and dependency management.
- **Technical Consultant** (March 2025 - April 2025) at **Third World Nerd**.
 - Technical consultant for TWN's video on fundamentals of **bitcoin** (blockchain technology).
- **Senior Software Engineer** (Jan 2024 - Oct 2024) at **Naamche**, contributing to their flagship product **reAlpha**.
 - Setup data pipelines and wrote geo-spatial queries for +2M real estate records (read-write replication, triggers, materialized views, indexing, full-text search).
 - Integrated **OpenAI Assistants** for RAG pipeline, worked on exception handling, and prompt engineering.
 - Led developments in document management and ID verification (**Docusign**), search auto-completion (**Opensearch**), performance monitoring (**Sentry**), CRM integration (**Follow Up Boss**), admin panel (**refine.dev**), data scraping pipelines, property comparison heuristic and map view, and more.
 - Onboarded interns/new hires to the existing development process and monitored their individual progress.
- **Software Engineer** (April 2023 - Dec 2023) at **Naamche**.
 - Configured multi-tenant database system (application-layer router) for **EthanAI**, deployed custom microservices for authentication, analytics, transaction processing, and data reconciliation, and wrote tests.
 - Developed a Python SDK for **Dealmaker** API (AWS Lambda deployment, token caching in DynamoDB).
 - Worked primarily on floor layout customization (rotate-resize-relocate tables using custom drag-and-drop UI), and data sync using **AWS Datastore** for an offline-first, restaurant POS web app.
 - Enhanced frontend chat interface and history panel for **Mimir**.
- **Blockchain Developer** (Jun 2022 - Mar 2023) at **iBriz.ai**.
 - Built responsive UI, monitored smart contracts, and integrated **ICONex wallet** for an sICX/ICX transfer portal.
- **Full Stack Developer** (Apr 2022 - Jun 2022) at **Ensemble Matrix**.
 - Worked on logic for signature vector extraction (canvas API), signature editor and admin panel interface.
 - Wrote a custom parser for **SAT** verification and integrated **Finacle** on the backend.

Personal Projects

- **Yudhisthira** (*Custom Blockchain*) - proof of work, P2PKH, wallet, db integration, visualizer/API, and more.
- **Guthi** (*Distributed App Development Framework*) - contributed to RPC, NTP client, collaborative whiteboard.
- **Our Rocket** - Rocket modeling using the OpenGL; model loading, lighting, skybox, camera motion, and more.
- **A Day in Pulchowk** (*top-down 2D game*) - contributed to tilemap design, asset loading, animation, and scoring.

Volunteer Experience

- **Founding Member** of **IT Club Pulchowk** – managed events, social media, marketing, and graphic design.
- **Editor-in-Chief** of **The Zerone** 2023 – led the editorial team, approved edits, organized competitions, and ensured timely publication.
- **Instructor** for workshops, including **Advanced C Workshop** (2021, 2022) and **Blockchain Fellowship**.
