To whom it may concern:

Subject: Letter or Recommendation for Pranjal Pokharel

Pranjal Pokharel completed a 3-month internship with us starting on March 24 and ending on June 24th, 2025. The internship aimed at the development, in Rust, of a concrete feature, relevant to our product. Understanding the feature, how it integrates with the product, and our existing codebase was part of the work. The internship was divided into 3 milestones, which were met on time.

Pranjal took the internship seriously and showed maturity in his approach to work. In particular, it was noticeable how organised and hard working Pranjal is. During the internship he managed up-to-date documents about his work, including designs, feedback and testing plans. By the end of the internship we got to see a live demonstration of the working feature that Pranjal was working on during the internship.

He was given concrete feedback on his overall performance. Two specific points to strengthen were on correctly addressing the feedback given at each milestone and on having a thorough understanding of the basic concepts the work revolved around.
